DETAILED ACTION

Election/Restrictions

1. In light of the amendments made to the claims by the applicant on February 6, 2007, Examiner submits the following written restriction.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to parsing the data types, classified in class 717, subclass 413.
 - II. Claims 7-24, drawn to token identifying and processing, classified in class 709, subclass 240.
3. Inventions are distinct from each other because parsing of first and second data types does not rely upon pre-defining token identifier to first and second sequence of data.
4. Inventions II & I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombinations as claimed for patentability, and (2) that the subcombination has the utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because parsing of first and second data types does not rely upon pre-defining token identifier to first and second sequence of data.
5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Applicant is advised that the reply to this requirement

Art Unit: 2143

to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
